

Ali Mahmood

Full Stack Developer

✉ alimahmoodrana82@gmail.com  Ali Mahmood  AliRana30

Summary

Full stack developer with hands-on experience building and shipping production-grade MERN applications. Strong focus on backend architecture, REST API design, JWT authentication, Redis caching, real-time systems with Socket.io, and payment integrations. Active open-source contributor. Handle projects end-to-end, from schema design to deployment.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C, C++

Frontend: React.js, Next.js, Redux Toolkit (RTK Query), Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSockets (Socket.io), Cron Jobs

Databases: MongoDB, Redis, Oracle Database

Auth & Payments: JWT, bcrypt, Stripe

DevOps & Tools: Docker, Git, GitHub, GitHub Actions, Cloudinary, Postman

Other: Django, LLM API Integration

Education

University of South Asia

BS Computer Science

– CGPA: 3.55 / 4.0

Dec 2022 – Present

Lahore, Pakistan

Experience

DevWeekends Fellowship

June 2025 – August 2025

Full Stack Developer Fellow

Remote

- Built production-grade full stack applications in a competitive 3-month fellowship with structured review and deployment requirements.
- Designed modular backend systems with RESTful APIs, JWT-based auth, and role-based access control across multiple projects.
- Practiced CI/CD fundamentals and containerization using Docker.
- Solved 100+ problems on LeetCode, including data structures, recursion, and time-complexity.

Projects

Noretmy – Freelance Marketplace

MERN, Socket.io, Stripe, PayPal, Cron Jobs

- Built a full-featured freelancing platform supporting both gig-based listings and milestone-driven project contracts with escrow-style payment flows.
- Implemented real-time messaging and file sharing using Socket.io; buyers and sellers communicate without leaving the platform.
- Integrated Stripe and PayPal for dual payment processing, including a formal withdrawal request system for seller payouts.
- Automated seller tier progression (level 1/2/top-rated) using scheduled Cron jobs that evaluate order completion rate and review scores.

MultiMart – Multi-Vendor E-Commerce Platform

MERN, JWT, Stripe

- Built a multi-vendor platform with three separate dashboards: admin, vendor, and customer, each with scoped permissions and independent workflows.
- Implemented JWT authentication with refresh token rotation and role-based access control across all API routes.
- Used Redux for centralized state management and efficient API caching on the frontend.

CampusCore – Learning Management System

MERN, Redis, Stripe, RTK Query

- Built a full LMS with course enrollment, video lectures, order tracking, and an admin analytics dashboard.
- Integrated Redis caching to reduce repeated database reads on course and user data, reducing average API response time.
- Added real-time notifications for enrollment confirmations and payments confirmation using Socket.io.

Movie Ticket Booking System

MERN, JWT, Stripe

- Built an online ticketing platform with dynamic seat selection, show schedules, and user booking history.
- Integrated a secure payment workflow with Stripe and booking confirmation via email.
- Developed an admin panel for managing movies, theaters, showtimes, and reservation records.

Open Source Contributions

Apache Arrow – PR #49171 (Merged)

C++

- Removed deprecated decimal factory APIs (`decimal(precision, scale)`) from the C++ module, cleaning up a post-v18.0.0 deprecation backlog tracked in the project's official issue list.
- Verified build stability across the Arrow C++ codebase and confirmed no regressions before the PR was accepted.

Apache Arrow – PR #49105 (Merged)

C++

- Fixed a segmentation fault in `SparseCSFIndex` equality comparison caused by missing dimension validation before memory access.
- Added automated test coverage for sparse tensor comparison edge cases, preventing future regressions in that code path.

Certifications & Awards

Quiz Competition Winner – University of South Asia, Fall 2025

Graphic Design Certification – Peak Solutions College, Lahore (Dec 2022)
